

LINEUP SCREEN

Powered by **DIGIUP**

LINEUP screen 230 double

– Powered by DIGIUP - One Image. Two Displays. Zero Offset.

The LINEUP screen 230 unites two DIGIUP displays within a single LINEUP frame to form one continuous, seamless image. Both screens run in pixel-perfect sync — no frame offset, no stuttering. From floor level to 2.3 m height, motion content, key visuals, and brand worlds merge into a single, unified experience.

- **Pixel-Perfect Sync**
Both displays run in perfect lockstep — pixel for pixel. No frame offset, no stuttering at the transition. Motion content reads as one seamless image across the full height.
- **Tool-Free Assembly**
The patented V-Lock closure system connects the LINEUP frame components in seconds — no tools required. Two integrated handles on the screen ensure safe handling during setup and transport. Frame and display are powered through a single cable, with power distribution to the display running directly through the frame.
- **Safe Transport**
Robust ABS cases with wheels and individually shaped foam inserts protect all components reliably during transport.
- **Premium Material**
Silver anodized aluminum profiles with 80 mm depth form the load-bearing structure of the frame.
- **Size & Format**
Product dimensions | Weight: 73 x 230,3 x 50 cm | 95 kg
Frame format: 73 x 230,3 cm
- **DIGIUP Display (x2)**
Both displays are designed for 24/7 operation and achieve a brightness of up to 700 nits. A 3 mm hardened glass panel protects each screen reliably. Content can be transferred via USB or through an online CMS.
- **RGB Backlighting**
The wireless RGB LED modules produce over 16 million colors and can be controlled via remote — enabling flexible color changes without additional cabling.
- **Fabric-Ready Frame**
The frame can be fitted with fabric on both sides. For this variant, a back panel fitting is recommended. The printed fabric graphic communicates additional brand messages and ensures a clean, professional look from both sides — no visible cables or connectors.
- **Consistent Panels Across LINE-screen**
All LINEUP screen systems use identical displays — color discrepancies between screens are a thing of the past.
- **Compatible with LINEUP Products**
The LINEUP Screen integrates seamlessly with other products in the LINEUP series, creating a cohesive, unified appearance across your entire trade show presence.
